## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-24 are drawn to a processor for controlling plurality of ballasts via inverter corresponding, classified in class 315, subclass 312.

II. Claims 25-48 and 59-64 are drawn to a microprocessor utilized communication ports for controlling a gas discharge lamp, classified in class 340, subclass 531.

1. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed in invention I does not require the particulars of the subcombination as claimed in inventions II for patentability, and (2) that each subcombination has utility by itself or in other combinations (MPEP § 806.05(c).

In the instant case, the combination as claimed in the invention I does not require the particulars of the subcombinations as claimed in the inventions II because a discharge lamp is controlled by a processor for controlling a level of a lamp ballast output signals obtaining via lamp ballast input terminals and does not require a specific arrangement of communication ports as claimed in the invention II. The subcombination as in the invention II has separate utility such as providing commands conducting via communication ports as channels for controlling lamp's behavior while the claims in the invention I utilizes simple inverter powers to energize different lamp ballasts.

2. Because these inventions are distinct for the reasons given above and the search required for each group of the inventions is different from each other, restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 2821

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
